1 The CVC-code (Card Validation Code) is an extra security code printed on your credit card. This code is only accessible to the cardholder, and is used to verify beyond any doubt that you actually hold the card you are using for this transaction. With American Express the CVC appears as a separate 4-digit code printed on the front of your card. For EuroCard/MasterCard and Visa the CVC-code is the final three digits of the number printed in the signature strip on the reverse of your card.
